Hi Ghislaine

Here is the response from the field

"The projects are in Bale, Borena and Gode Zones. The former are one - two day drive, the latter a flight (from 3 - 7 hours depending). I'm afraid there's nothing nearer to Addis. In terms of a day trip then, it'll be difficult to see anything in that length of time, travel aside, you still have to get to a field site from the main town so that's more journeying. I think you'd need three days minimum to actually get to a health post and see some activities."

If you were still interested in visiting something I would have to get in touch with the Country Director soon - who may decided this is not practical (due to staff resource, work plans etc). So if you could let me know your thoughts as soon as possible that would be great.

Best wishes, Andrea
