Subject: some people

Good to talk-

here are a few names in the brain/neuroscience:

Pasko Rakic, (you need to talk to him to hear what he is doing in areas of interest; it is not evident from his site)

<http://rakiclab.med.yale.edu/>

Richard Anderson (again, one needs to talk; he is doing a lot of advanced stuff off the record for DoD, he might admit...or not)

<http://www.vis.caltech.edu/>

Ralph Adolphs (again, more than what is written...the pattern among neuroscientists is a little spooky)

<http://biology.caltech.edu/Members/Adolphs>

All these guys are good at what they do, and can be deep...

More soon, esp. details on Santa Fe.

B.
