Subject: Guatemala

Here are some pics from Tikal in Guatemala.. crazy amount of ruins. We had to hike through the forest to get to each grouping of ruins and came across spider monkeys, howler monkeys, 2 types of toucans, a Guatemalan raccoon, 2 types of woodpeckers and some other birds I don't remember. We passed a big lake on our way to Tikal where they had all of these little "huts" set up along the shore line where they wash their clothes. The views from the tops of the ruins were amazing.

We came to Ambergris Caye today; going on a few snorkeling adventures tomorrow; Shark Ray alley, etc.. I might get in the water at Shark Ray alley, where you swim with non other than sharks and stingrays. We'll see.

We stopped at the zoo this morning and saw a jaguar, puma, and a bunch of other crazy animals including the attached photo of a Tipar. So funny looking.. How's it going in PB?
