Jeffrey

"The ascending levels of the hierarchy of complexity demonstrate emergent properties at each level that appear to be non-predictable from the properties of the component parts." Your Great Grandpa Abraham explicitly discovered this 3700 years ago and we have been studying this subject for a few thousand years.

The "levels of complexity" are such that standard human intellectual equipment cannot process an understanding of such. If the human brain and being significantly develop they can grapple with this material. We have not been wasting our time in those rooms full of books for 3000 years.:)

I am having surgery, with H-m's help, this Thursday. Please have a conversation with the CEO and sole shareholder of the Universe on my behalf. Please keep it going past Thursday during the recovery period.

Mark

PS Thank you again.
