Subject: Entrance. LSJ Island

Dear Jeffrey,

You will find enclosed two proposals regarding the Entrance of the Island. Both are providing an easiest access to the back of this section of the property for the trucks. They also offered a clearly designated and, also, more inviting entrance to the guest quarter of the Island.

I would like to stress again that these drawings are just plain sketches illustrating different options which could be used for a reorganization of the entrance of the island.

Should you mark any interest for these proposals, a detailed survey should then be done and discussed with you in order to adapt them to the existing structural conditions of the entrance.

Looking forward to hearing from you.

Best regards,
Christian.
