Subject: in DC

following meetings here and in NYC.. here for the day... would like to talk again when you get back from middle east.

btw.. I thought you might enjoy a comment by a 'star' from UCLA we are trying to recruit to ASU, in a letter he just wrote to discuss what was necessary to move him: ". ASU is very strong in paleoanthropology, especially the critical area of late Middle Pleistocene Africa. Kim Hill is a singular resource in human behavioral ecology, probably the most productive scholar and most original thinker in the world in that area. "
