**Subject:** nice responses

I don't know who put up these posts to my interview, but the science site is getting well linked. Daniel is working hard on editing his interview.

## Reader Comments

Brilliant! This was one of the most fascinating interviews that I have read in a long time. Real and down to earth. I saw his talk at TED, but it was nice to see him spell out his additional thoughts here.

Very constructive dialogue, and rich philosophy, a both questions and answers are manful, impressive, and helpful for the upcoming generations. This was one of the most fascinating interviews that I have read in a long time too.
