Title: Life Science deal Jeffrey- hope you are well and would like to see you when you are in NYC. I have an opportunity to place the remaining tranche for a life science company with a pedigreed and experienced management team, great pipeline of oncology drugs on extremely attractive financial terms. Two experienced and large institutional investors have committed \$12mm of the \$18mm in the latest down round and want to know if you or one of your clients would be interested in the \$6mm balance. Let me know.
