wind at Teterboro is 330 to 340 degrees at 15kts gusting 25, from the photo it appears the aircraft is at the end of runway 6, which is the shorter runway at 6000 feet long. challenging crossing gusting 25kts., prefered would have been to circle to runway 1 and less of a crosswind, usually in this case they are using runway 6 for landing, departures on runway 1.
