My buyer is asking about a response to the contract and the deposit . We need to move this forward as currently the helicopter was removed from the market for you.

More importantly I heard last evening that your purchase of the 76 is part of the bid to Argentina, that gives me pause for a number of reasons.

I attended the bidders conference and the main stumbling block is what to do with the S-70, has your group solved that problem?

I understand the award is not until mid October which creates a further problem regarding our closing , pre buy etc.

Perhaps my source was incorrect but we need to discuss the next step regarding the sale.

Please call me on my cell 2019061411
