what about if you just invested in innovium media (CVE: IN) -- this is the [REDACTED] family, close with [REDACTED] -- and innovium used the proceeds to invest in seed? innovium now only owns its share in seed. this is how [REDACTED] made her \$1 million investment. this way you and [REDACTED] would also influence innovium, biggest seed shareholder. and [REDACTED] has talked about ultimately using innovium to take seed public on TSX if we ever thought that made sense. this could be done very efficiently because of [REDACTED].
