Subject: PR Palms

Good Afternoon,

After our meeting this morning, I began notifying the related parties, namely Boyson Inc. and Gramas Del Sur Farm to inform them that we would like to move forward on Thursday Sept.16th.

Boyson Inc. Just wants us to have ALL our dots connected, so this goes smoothly, and within the allotted timeframe.

The Gramas Del Sur Farm wants me to come This Thursday and Friday (Sept 9&10) so I can Tag all the trees, so that they will Have Monday, Tuesday, and Wednesday, (Sept. 13th - 15th) to remove the palms and prepair them for transport on Thursday Sept. 16th

They also would like me to be there for the transporting of the palms from the Farm to the Ship on the 16th.

* I need to have final approval from you,to go forward,
and, I need to know a Grand Total Number of trees to tag,
And which species, Exactly.

As of now, I had calculated a need for 85 trees, Gary Kearney then brought an area to my attention that would increase the total tree count by at least 15.

I have also counted the potential lost trees from Hurricane Earl, and We have a total of 35 palm trees, that "May" not make it.

This does not include the now open spaces left from dead branches that have been trimmed, or dead trees (non-palms)

The "discounted" prices begin at 200+ trees.

Please advise.

Thank You,
Igala
