Subject: Plan of attack

Jeffrey,
This is what I have come up with.
I am going to install two new inverters.

-The new C inverter has a cooling fan issue causing it to shut down after 45min to 1 hours of use, since the fan is contacting the shroud. It is working at this time after freeing up the fan. (C inverter transformer Rectified operates normal.)

-A inverter hard failed after take off yesterday and is still inop at this time, (A inverter TR operates normal with good voltage out).

I am locating two inverters to be fedex and delivered to St. Thomas by noon tomorrow. More update when this is confirmed.

Thx,

Larry
