Jeffrey

We are sitting on the TSG invoice. They do not have a Warrenty past 18 months which we have, I do not believe it's necessary for an extended warrenty as the system is very simple. I do think it is necessary for a service contract with monitoring to be in place. We have that covered.

We are ready for their installation of their equipment in the slabs about ready to pour and need to release them to go forward.

I need your approval to release payment and proceed.

Gary
