Subject: Roubini

I see on Bloomberg that Roubini spoke at some forum at Michael Milken's institute yesterday, and they agree on the world debt problem and carbon tax as a way to help solve it. I did not know anyone gave a damn what Milken has to say these days. Shows you how much I know. I guess teaching computer skills to school kids while on work release rehab-ed his reputation. I will try to find you a gig like that.
