Title: So the Dubno family decided to see if

We could find any of the lost tribes for Passover on St John. Brother Mike rented a nice house called Indigo in above Cruz Bay.. At 18 deg 19'2.49"N, 64 deg 47'19.01" W.

As Jesus on the cross said to St. Jeff---- "Jeff... I can see your house from here." :)

Anyway, you mentioned you might be coming to your neighborhood later... That's the info. Apparently we also have some kind of 50 foot sailboat.

I don't know if I mentioned brother Mick went out of retirement to become Band of America's high tech exec... Building Merrill etc the market trading system like the one he did for Goldman... Which kept them solvent while the others, um, not so much. He negotiated a sick deal and now he's their great white hope...

I am planning to put together a workshop on crypto... Less focused on your theme...though we could incorporate it... And more about how can we circumvent authoritarian regimes who want to keep scientists and human rights folks etc from getting through safely on the web. Also, trying to get a clearer view on the methods and consequences of successful encryption schemes. A bunch of Israeli hackers are in this with me as well as the chief disruption officer at Darpa, Dr. Peter Lee... Cool guy.

I'd design this so you'd get your questions answered if you'd help me get mine.

We're trying to build new tools or use existing tech and ramp em out to make discovery more difficult.

I am not sure yet how great you would find her but I've been turned on to a computer programmer and bio hacker named Meredith Patterson... Send you a separate article. With a face only Helen Keller would love.
