hi jeffrey,

can i do that sample with gold leafed circle on white..you liked, direct on the wall? i need a hard surface to do the texture of the circle,...on the paper its hard to do that because the paper get wrinkled. if its gonna look good we can keep it ,if not i can remove it and have a white surface.. no damage.

.....

and regarding to waxing the furniture, i know people who can do that. i know how to do that too, so i can supervise. its not complicate..its just a meticulous job.., we have to put two coats of wax and burnish. the thing is we have to get the wax from new york, it called "liberon -black bison" and its used for high end finishes. this is the best...i know the store where we can get it cheaper.

anyway i can take care of that waxing job if you want.. just let me know when you want to do that.

thanks
ion
