Subject: Boeing price

Jeffrey,

I was going to have Sean run a full page add in controller magazine, re-introducing the Boeing 727 and list that we are SFAR88 fuel tank compliant now and re-Emphasis on Super 27 with re-engine high thrust. add price is \$850.

I would like to list a price in the add, there are 14 on the market at this time, there are two listed that are Super 727 re-engined like ours with prices asking price of 5M....I was told the Nelson Peltz sold his Super 727 in a give away price for 2M,,,it was a super 727 which means re-engined and 20 feet longer that he was originally asking 16M, a -200 aircraft...I do not know how true that info was,,,I heard it while I was at Flight Star picking up our plane...

I was thinking of asking 6M if you think that is appropriate, Sean is going to call me later today to give me his thoughts

thx,
Larry

here is one comparable to our 727:
