**Subject:** Super to meet you!

Hi Jeffrey,  
Super to meet you! Excellent day. Thanks very much for inviting me.  
We seem to have many vision overlaps and a good resonance on strategies.  
I'm interested to explore ways to assist you. Let me know what your specific thinking is at the right time for you.  
It is fantastic that you checked Einstein's letter to Michele Besso's widow in the original German!

You obviously are a serious thinker.

Some quick follow-up notes:

On the "Humble Approach Initiative" (research symposia series I created), see:  
(for the full list) [REDACTED]  
(for the best one we discussed, at Stanford on the multiverse  
idea): [REDACTED]erse%5F  
[hai/](#)  
(which had an associated public event):  
[http://\[REDACTED\]5Flectur](#)  
[e/](#)  
(and a follow-up meeting, also at  
Stanford): [REDACTED]  
[index.htm](#)  
(and with other meetings involving Martin Rees led to the book, "Universe or  
Multiverse?"): [REDACTED]80521848411  
(one you will find quite interesting, on  
MUSIC): [http://\[REDACTED\]Finitiative/music/](#)  
(at the IAS, honoring  
Freeman): [REDACTED]nal%5FCreativi  
[ty/](#)  
(involving Martin Nowak and other top game-  
theorists): [REDACTED]  
[he\\_Global\\_Good/](#)

More than a hundred additional projects, including many conferences and books are referenced,  
often with URLs, on my website:

[REDACTED] (for the listings, see the "About Us" section).

On Einstein's view of the nature of time, a useful book with lots of source data references is Palle  
Yourgrau's:  
"A World without Time: The Forgotten Legacy of Godel and Einstein."  
(FYI: Jim Holt's review: [REDACTED]8crat\_atlarge )

The physicist Stephon Alexander, whom I described as being in the FQX network is:

[REDACTED]  
He's a real kick and seems to have the great gift. But I do not know his work very well yet.

Andrei Linde's wife Renata Kallosh (clearly an astonishing genius)

is: [\[REDACTED\]ata.html](#)

On the genius pipeline, supercreativity and math circles, again the book on Bohr & Copenhagen I mentioned is

Gino Segre's "Faust in Copenhagen." I found it to be vision-inspiring on the design of supercreativity.

FYI see some of the stuff I organized at Princeton at few years ago honoring von Neumann on the occasion of 50 years since his death:

[REDACTED] [final3.pdf](#)

Especially good for historical details, see:

"The starting point for the discussion is *The Social Construction of Hungarian Genius, 1867–1930*, a paper by Professor Tibor Frank, an historian of Hungarian exiles."

(on line paper: [REDACTED])

On the math teacher at the core of Budapest's supercreativity, Laszlo Ratz, see: [REDACTED]

Again, super to be with you.

Many thanks again!

Allbest,

Charles Harper

Thank you for yesterday. there turns out to be a black physicist society, that was an eye opener, Einstein letter to Besso is not clear. the German merely stresses the fact that Besso preceded Einstein again. a little joke about their work less about time and its direction
