**Subject:** Sod

Randy has spoken to his two sod growers who have both told Randy that the sod they have looks bad (brown). This is due to the recent weather. Randy said that he can put it in but it may look brown for a month until it comes back. He can try to feed the grass nutrients to speed things up. If we want to wait for new sod it will be 2 months. Randy is going to try some smaller grass growers to see what they may have.
