Jeffrey,  
I'm feeling more confident,  
Stall warning computer started working after re-racking the #2 stall computer, we are completing full operational check, we have dual stall warning systems.  
-loaner audio panel was located, I will find out arrival time, still trouble shooting our audio panel as backup also.  
-working anti skid intermittent light.

PS; Sean informed me he received a call regarding the Boeing, he is the same person that was suppose to come and view the plane several months ago, I told Sean to work this buyer hard.

Thx,  
Larry
