**Subject:** Horrible

That was the worst flight!!  
-#2 stall warning inop  
-captains audio panel, speaker stop working, even head set doesn't work on left side.  
-anti skid was intermittent light.  
Gulfstream is working on it as we speak,  
I hope to have better news tomorrow.

I hope its just exchange on stall warning computer.  
The item that concerns me the most is the audio panel item, since ours is the only one in existence, so it will need to be repaired.. It worked fine the first hour, when I let Dave fly, it stopped working.  
I will keep you updated, they will work 24 hours a day to make our schedule.
