Interpretation:

RN: 232874

Combined Paternity Index: **0**Probability of Paternity: **0%**

The alleged father is excluded as the biological father of the tested child. This conclusion is based on the non-matching alleles observed at the loci listed above with a PI equal to 0. The alleged father lacks the genetic markers that must be contributed to the child by the biological father. The probability of paternity is 0%.

Report Date: 12/1/2009

Note: Since the samples were not collected under a strict chain of custody by a third neutral party, and the Laboratory cannot verify the origin of the samples, this test result may not be defensible in a court of law for the establishment of paternity and other legally related issues. The tested parties expressly understand that the result from this test is only for personal knowledge and curiosity.
