**Subject:** Work at house tomorrow

Ballace Tile & Marble called and had to cancel tomorrow's visit because of the weather. After they pressure clean the deck they seal it. The sealant can't be applied in the rain. They said it would be a full day of work and would like a day next week.

On another note the electrician can not work in the rain either. He will need not be able to put in the sockets around the pool until the weather clears.
