Subject: Simon Winthrop

Simon wanted you to see his website www.laserslasvegas.com for possible ideas to do a laser sculpture on the island.

He said "he has some illusions that David Copperfield doesnt have-that would be perfect for the island-a couple of them are on the special effects page at www.laserslasvegas.com and other like the laser tunnel are at www.simonwinthrop.com On the Shows page"

He also said he could rig the laser sculpture to a laptop which he could change the design of remotely from anywhere in the world.
