**Subject:** Robert Evans

Hi  
On Tuesday you will receive a movie deal

Robert Evans the producer of The God Farther and many more is about to produce a huge trilogy SI FI thriller.

The guy behind this is a 28 year friend of mine who has been given the executive producer position for this project.

My buddy Henri Kessler has acquired the rites to the British TV production from the 70's called UFO

The team that has been assembled is cutting edge on the production side mixed with a new director in terms of blockbuster in the same vane as Coppola was for Godfather

Anyway it is a great money making opportunity and I have asked Henri to send to my office the Screen play as well as the bridge financing deal and the production funding business plan.

I will Fedex this to you on tuesday. This might be a really exciting project. The cast is being optioned and at the moment there is an english group that are interested in funding the project..thought of you for this.  
I would want you to meet Henri as he has the project in his blood and the business side needs to be explained to you by a pro.

The idea is to have be the most break through SiFi movie since Ridley Scott's Blade Runner.

I am really hoping you would look at this

See you on Tues night or Wed morning
