[LSJFiberCosts.xls](#)

Hey Gary,

We calculated 51125.35 for installing the fiber equipment on the island and migrating data service from the existing main house location to the new engineering building. We're pulling additional capacity to the gym in anticipation of future services at the helipad, new house construction and library. The only number missing is an estimate from a Puerto Rico contact for consulting services in assisting to resolve and migrate single mode fiber issues on the island (life line for data and telecom) as well as airfare/lodging for NM phone consultant. I've attached the excel spreadsheet for review.

I anticipate delivering a more thorough analysis to JEE Wednesday but wanted to get you a ballpark number for your meeting.

Please let me know if you have any questions,

WM
