Morning Sir,

The construction project expanding the laundry room is going to disrupt the conduit that delivers phone and data to the communications room currently located in the main house. I wanted to take a trip down next Tuesday to talk to Mr Kerny so we can develop a cost for moving everything to the new engineering location and relocating existing services. I just wanted to make sure it was ok with you prior to scheduling a flight. I figured while I was there I could lend a hand resolving the fiber break we still have there as well.

Thanks,

WM
