Subject: Re:Proposal

[REDACTED]
The price for the proposed work is based on the following:

1. Supply and install 10 copper bullet flood lights with long shield and 50 watt par 20 flood lamps on 8 palms on west side of pool and 2 on single palm by cabana. 8 would be mounted on 36" posts behind bushes and 2 mounted on 12" posts by cabana.
2. Remove 4 mercury vapor fixtures at west pool and supply and install 4 weatherproof 110volt GFI receptacles in existing posts.

Labor and material for above. \$8400.00

Note: Price does not include trenching and removing plants for install of conduits.

Alan at Efflorescence will provide labor for this part of project. I estimate at least 4 days for 2 men to complete this at a cost of \$864.00.

This is not included in my price and any additional time needed by him to perform this work will be billed at \$18.00 per hour.

I will provide you with a complete written proposal Monday if you can give me a fax number.
If you have any questions please call. [REDACTED]

Thanks,
Joe Doran
