Hi [REDACTED] and Jeff,

I'll be in the States during September and October. Am getting deeply involved in the search for Air France 447 but am very interested in pursuing this idea. I know the audience appetite is there and the untold science stories are getting more compelling by the day.

Today alone I saw some new footage and heard some new breakthroughs that just made my head spin.

Happy to talk whenever...

Dave

Please know that Dave and I are very interested in pursuing this science conference idea, location, etc. Sounds like great fun.

I'm about to leave for most of the month of September -- first a yoga retreat in Canada where I'm unlikely to have cell signal or email and following that, I'm heading to Amsterdam to speak at a conference and I'll be in Europe for a bit.

I return to the states by Sept. 27. Happy to pick up on this at that time!

xo
