Subject: PERSONAL AND CONFIDENTIAL: You may have missed this on vacation...

Even though it happened before... but here's a really great "ESP" spoof to pull on your friends.

The BBC did this a while ago, but it is so strong... you will convince your "subject" they can read minds.

Its actually just a simple trick of where you click the mouse.

This explains how the bogus esp test works:

And here's the website you need to screw with their heads:

In re: Gadgetoff: And Dean Kamen, Yossi Vardi, most of MIT, a bunch of Stanford, loads of folks who go to the Gathering For Gardner... plus a whole bunch of unsavory hackers who like to burn stuff... joined by folks from DHS.... Tom Kalil from the White House... etc etc...

Very few vultures... but Peter Diamandis spoke... Mike Hawley was ready to play piano ☺...and Ricky Wurman was kvelling.

Minsky got sick... and he's in the hospital..which is fucked.

Wasn't in the mood for a lot of the usual TED suspects but quite a few showed up anyway.

That is all.
