Subject: AGI, expert reviewers, etc.

Hi Jeffrey,

Thanks for taking the time to chat with us yesterday -- we were all impressed with your ability to ask good questions and probe to the heart of the AGI systems we're describing. Although, of course, AGI is a very complex matter and in a short time only a small percentage of our work and ideas can be conveyed.

I felt bad afterward that, once again, I left without showing you any demos of our AI system doing stuff!! I had demos of virtual dogs and language processing and such right there on my laptop, and even a video of the humanoid robot ... but the conversation was sufficiently preoccupying that it slipped my mind. Next time!

We will work on the "expert reviewers / endorsers" that you requested ... we have a few folks in mind ... and will let you know once we've got that covered [shouldn't be too long]

Eager to move ahead with creating superhuman AI ;)

thanks
ben
