your medicne will take 20 weeks to work,, if you wait until sept. it won't be  
right until jan, then there will be no, work, and you will have to wait until april  
again,, i think if you are serious start your medice immediacetly and wear  
sunscreen or stay out of the sun,, it is up to you,, it is a choice, if you choose  
to stay in the sun, instead of focusing on your career, its ok with me,, but it is  
you that will have to live with the conswequences of that decision. think hard
