Subject: Kitchen TV operation

home theater ops in Kitchen PBI,

- to watch TV using the Yamaha remote select Aux on upper row of remote
- to watch a DVD use the "DVD" button on upper row of remote next to AUX.
- 5 beam is preferred selection for audio listing of movies,,,this should be already in use, this button is located in the middle of the remote.
- the room was calibrated for sweet spot listening at kitchen table directly facing the TV set,
- to change channels we still have to use the cable remote control.
- use the volume control on Yamaha remote.

Larry
