Jeffrey,

I contacted the company from the link that you sent me and they do not have anything in stock and it would be about 6 to 8 weeks to fabricate and cost about \$ 10k.

I found this company (see this link and let me know if this would be ok)

<http://www.sheltersdirect.com/instock.php>

both companies mentioned that a permit may be needed and the structure would have to meet hurricane standards. I spoke to Doug and he said that is probably the case but we can go ahead and do it and then worry about the permitting issue if it comes up.

This shelter is in stock and would be shipping from Maryland (I'm waiting on the shipping quote) also there will be a 6 % tax.

Please advise

Thank you

Emad Hanna
