An interesting  
> letter in the Australian Shooter Magazine this week,  
> which I quote: "If you consider that there has  
> been an average of 160,000 troops  
> in the Iraq theater of operations during the past 22  
> months, and a total of  
> 2112 deaths, that gives a firearm death rate of 60 per  
> 100,000 soldiers."  
>  
> The firearm death rate in Washington , DC is 80.6 per  
> 100,000 for the same  
> period. That means you are about 25 per cent more likely to  
> be shot and  
> killed in the US capitol, which has some of the strictest  
> gun control laws  
> in the US , than you are in Iraq .  
>  
> Conclusion: The US should pull out of Washington
