Subject: garage speakers

Jeffrey,

-The four Linn speakers with light wood and one with red velvet cover, have blown tweeters, they where installed in Boeing. I told Januiz to throw away on trash day. not worth repairing.

-two Black Eclipsch book shelf speakers are operational.

-15" inch Sunfire Subwoofer has blown amp, I will have repaired, great sub.

-two Eclipsch center channel speakers from LSJ, have blown speakers and hole, I will repair.

-AMS subwoofer is old, but works. they where in Gym till we replaced with the 15" eclipsch.

-Two NHT outdoor black bookshelf speakers from LSJ, operational.

I will bring these items to the Palm Bch house storage unit when I return.

Thanks,

Larry
