Title: Re: Design questions: Jeffrey,
We will give you a schedule which will be inclusive, later today -

- She has been reviewing for the Big Picture to integrate
 - The Nursery
 - Pop's Garden
 - The roads & intersections
 - Board walks walls etc.
 - Fruit tree relocation
- The East flag
 - We met last week with a UVI specialist and are going to get some proposals and plant types for you review.
 - We expect to give you a plan A with plants that need water and a Plan B with indigenousness plants

I understand your frustration but things **are** moving –

on another note: With the UVI guy

We also discovered we have Hurricane grass on island trying to get started out past the little salt pond on the upper road. As well as the burmuda grass underneath over growth which we be cutting back to let the grass out.

We will be addressing the condition

Curtis
