**Subject:** Hola!

Hello there!

Was thinking of me and thought to let it spill onto an e-mail! ; )

I like that you ask questions in such a way that is direct and to the point. You asked about the Scenar device and what I am up to... Basically I am under the great inspiration and intuition of simply raising the bodies vibration. As you know well what affects your energy, people, conversations, movement, interactions, what you think, etc, etc. I am finding certain movements and especially some devices are coming out of the Quantum Physics field, mine being just one of them, basically "nudge" the body, on a cellular level, back to their highest, healthiest path. I would love to connect more on this level with others in this field.

I will say that I really love talking with you, hearing your ideas, suggestions. Have also really enjoyed exchanging ideas with Igor. Would love to do more!

Hope you are finding some wonderful things in your day!

BIG hug!

: )
