Thanks. Tell Jeffrey him that this is more evidence that Spot On and Dick Sherwin knows what they are doing. The proliferation of Wi fi enabled devices forces carriers to support Wi Fi devices. This still does not solve the problem that Spot On fixes the lack of signal in a building. The Wi Max (and even cell) signal can't penetrate buildings, as is the case in NYC and other large cities. This device only helps us, since we can bring back haul using Wi Max and deliver Wi fi within the building cheaply and efficiently.

I'll be around tomorrow afternoon, maybe even later today. I'll call about his schedule.

We found the real 'Hotel California' and the 'Seinfeld' diner. What will you find? [Explore WhereItsAt.com](#).
