Subject: plan update

Mr. Epstein; Just an update on the plan for the second flagpole area. It should be completed by Wednesday. This plan will be in blueprint format but will be very detailed as to the number of plant materials. The materials that are salt and wind tolerant usually tend to be boring but necessary, If you like we can stagger the materials and put some color on the lee side of the salt tolerant materials. Will this work for you? If you have any questions, please let me know. Best regards. Mat
