I just spoke to an apple consultant who informed me that Adobe Acrobat Pro 9 would be the way to go for sharing invoices since apple's version of a PDF viewer is "Preview." He said that it might be a good idea for us to try it for free for 30 days to make sure it is the right program for our business and that we like the interface. I will make a couple more calls to other consultants tomorrow to make sure they all have the same advice.

Story

The apple consultant I spoke to was:
