Title: FW: Steam Equipment Jeffrey,  
Take a look at Bill's thought process below. I will call to discuss.

Yes, the budget is probably high. It was based on six very vague pages and done in considerably less than a day. I figured a completed residential system with all the bells and whistles at about \$8000. I understood that we may want more capacity, so I doubled the number to either put in two units or find a bigger commercial unit. I then added \$2000 more in case it was foreign made and we needed to pay duty, and shipping. I can get more precise on the budget when I am given more information on what we need. This also included installation.
