**Subject:** FYI

To JEE:

The Ranch was hit with a major electrical and wind storm May 29th knocking out the Wireless link between the MH & RC, MH & Staff Cottage plus the Cellular Network Extenders. We have tried to get all areas back up & running, but it is clear that the radios were hit and will not maintain programming, hence why the service continues to drop out or is not up for hours on end.

Valcom will be submitting a proposal today to change out the radios, will forward once in hand

Regards  
[REDACTED]

PS: The flag pole at RC was also blown over during the storm, breaking approximately a foot from the ground. Are investigating replacement options
