I send you some stuff before but I think that it does not hurt resending it as it will better prepare you for a meeting with George W.

GW10 – is an interesting assay by George on various subjects (mortality, machine vs human, intelligence etc) that you would enjoy reading. This will help you understand how George thinks.

Science – this is his interesting article on energy (I think I did not send you this before).

HBS Study – this will help you understand how George works and operates.

Compiled work and publication – This will help you understand then scope of problems he has been working on.

TED talk – this will show you how he talks.
