b=ological systems unlike physical systems are default♦=A0 on where machines are default off. =C2♦ it is symmetrical. physical syst=ms are predictable ie calculus works at the limits. ♦=A0 , biological systems do not . they work at the avera=e. their is beautiful symetry between living and s=ystems and non living . phsical systems are =ncapable of intent.and deception . biological systems a=e built on it .

Time scale ?♦=A0 is human consiousnes dependent on a time scale. =C2♦ are phsical systems bounded by the speed of light = and mental constructs faster than light does biological signa=s /energy travel faster than light. making its detection=, invisible to any physical system. ?

I would liike you to consider the consiousnss a= primarily imperfect error correction system and also a =rainer teacher. the vast majority of your actions are =carried out, without itsongoing involvement. it is there =overwe when awake to correct errors. . it is slow =nd imperfect. lets some errors through, as they co=e too fast for it to stop them. It makes the free will a=gument much more complex. . It tries to course correct.=C2♦ If you were to imagine the flippers on a pin ball machine.♦=A0 that is consiosness. it tries to direct=C2♦ the balls , missing some, getting others. if the f=ow is too fast. it misses more. like during high emotional sta=es.

There is a large body of work that=for ex suggests that when you reach for something =C2♦ your hand shoots out and along the way it makes corrections.=C2♦ that is your consious input

If you are tired♦=A0 the flippers work less effieciently

FREE WI=L , the balls will come down. you can =ttempt to modify their path, with dynamic guard rails. a=d flippers. but cant get them all.

You can pl=y the piano , but not consciously. you can t=ain your subconsious and then when playing hear the error. but ♦=A0 not avoid it. that is too fast for the consious to correct.=

It would also make the justice system turn=on its head ,as the answers to questions as to why did &=uot; YOU "? do that , the correct answer woudl be becuse =y consious error detctor was incapable of stopping it. =C2♦ the latin

mens rea. would not suffice, it would not be what was in your mind, it was an error of the system. black s erro r correctio= systmen is less efficent therefore causing it to allow bad behavior to ge= through. they cant stop the beings impulses=
