Jeffrey

The RO plant on LSJ is still down  
Reefco was out yesterday to review situation  
16 x 32 MA fuses had taken a hit  
Even after these were replaced the plant would still not operate  
TSG have been contacted and are working remotely to determine problem  
Danny is trying to figure out away to bypass control program and run plant manually At this time there is  
enough water for 2, possible three days  
We should know by 3pm if we can run system manually
