Time present and time past  
Are both perhaps present in time future  
And time future contained in time past.  
If all time is eternally present  
All time is unredeemable.  
What might have been is an abstraction  
Remaining a perpetual possibility Only in a world of speculation.  
What might have been and what has been  
Point to one end, which is always present.=</span> Footfalls echo in the memory Down the passage which we did not  
take Towards the door we never opened Into the rose-garden. My words echo=<br style=""> Thus, in your mind.  
=<nbsp;=<n=sp;      &n=sp;      &nb=p;But to what purpose  
Disturbing the dust on a bowl of rose-leav=s I do not know.  
=<nbsp;=<n=sp;      &n=sp;      &nb=p;Other echoes  
Inhabit the garden. Shall we follow?

Interesting way of putting it Brian. It seems, a bit, to incorporate your ideas about signs being important. It would also seem that it could overlap with Ruth's theory - Ruth also seems to be saying that at any decision point there are a number of possible futures out there and you can choose which one to go to through a process.

I tend towards the block universe view myself but there's a lot of good discussion to be had here.

You would see past, present and future coming into being together and there would be no problem with causality running both ways.

The future is not here now: what is here now is the process that will lead to the future. Think of it being like a bus with a destination on it: that sign indicates where it will be, but currently it is somewhere else. And by getting on a particular bus we can determine our own future, but we are not there at the moment.
