poetry allows one to paint their own meaning on =imilar words.

I would like you consider the following. =A0 during the industrial revolution, descriptions of man=became mechanical. , everyone looking for new mech=nisms. ie machine movements. machines need power to run =n their natural state they are OFF. default position OFF=C2

people have default ON.=C2 each piece trying to stay on.

freud=described falling asleep. and dreams turning on. =C2 I believe that incorrect. I believe that dreams , the in=er workings are ALWAYS on. consiousness gets turn ON when=awake and OFF when asleep. . it takes energy to keep up =he consciousness screen ON sleep provides the time re charge.=C2 . the voices the schizo hears are his own, but his=conscious „doesnt make the distinction between inside and outside. =nd is certain others are speaking to him/ the all have sleep disorders. =A0 . and keeping a person awake forcefully in prison leads to =hem repeatedly hearing voices. ( their own inner ?) . =A0 I believe that drugs that turn off your consciousness during the d=y, allow more direct access to inner workings but not useful as they proba=ly cannot be modified. ie you and I eating french fries :)

</=iv>

if you consider consiounes a user interface, between inner working=and self. . language becomes the way that inners speaks to sel=. chomsky now agrees with me.

self aware is =ricky, is the computer screen aware of the processor or process behind it?=C2 the camera on our skype is it aware " of the image? =C2 light adjusting screens seems aware of the level of ambi=nt light. .

I ve been doing some remarkable=experiments. .

Interesting way of putting it Brian. It seems, a bit, to incorpo=ate your ideas about signs being important. It would also seem that =t could overlap with Ruth's theory - Ruth also seems to be saying that=at any decision point there are a number of possible futures out there and you can choose which one to=go to through a process.

I tend towards the block universe view myself but there's a lot of good=discussion to be had here.

> Deepak's statement is very broad, however, being in an outside=of time transcendental state where the universe appears to be spontaneous =imultaneous emergence of space time events would not contradict the block =universe model. You would see past, present and future coming into being together and there would be no problem with causality running both ways.

The future is not here now: what is here now is the process that will lead =o the future. Think of it being like a bus with a destination on it:=that sign indicates where it will be, but currently it is somewhere else.=C2 And by getting on a particular bus we can determine our own future, but we are not there at the moment.

Brian
