Good day =||

Choice was able =o remove and =epair the Dragonwave radio at the Bovoni =ower. The damage was minor and the =important components were intact and fully =unctional. Choice made the minor repairs and reinstalled the radio =nd the Choice =nternet link is restored.

Allister, who =orks closely with Hector recommends 1 or 2 spare =ragonwaves to be on standby.

FYI:

In addition, I continued to investigate the repair policy with Chris from FutureTech (our Dragonwave =ender). =e stated that =he warranty on the Dragonwave radios do not cover lightening =trikes.

But the =rotocol for repairs is:

- \* Securely pack the dragonwave and =ddress the package directly to Dragonwave:
- o DRAGONWAVE =NC. 600-411 LEGGET DRIVE OTTAWA, ONTARIO CANADA, K2K =C9
- \* once the radio is received and =agnosed by Dragonwave they will provide a repair cost (if it is not cover under =he warranty). At that point it takes up to 30 days for the radio to =e repaired and sent back.

Regards

Jruan

Good evening =||

Please be =vised that lightening struck the bovoni tower damaging 6 radios =ncluding ours to little St James. We are currently only running on the =ingn fiber.

Choice will =move the radio from the tower when it is safe and bring it to us for =epairs.

Regards =/FONT>
